|-------------------------------------------------------------------------------------------------------------|
| <p style="text-align: center;"><b>MATH 25004 – Calculus II</b><br/><b>Course Syllabus – Summer 2026</b></p> |
|-------------------------------------------------------------------------------------------------------------|

**Professor:** Kevin Tuttle  
**E-mail:** [kjtuttle@uark.edu](mailto:kjtuttle@uark.edu)  
**Office Hrs:** 10:45 – 11:15 am MTuThF, or by appointment (virtual office hours via Collaborate are also possible.)  
**Course Number:** MATH 25004  
**Course Name:** Calculus II  
**Semester Credit Hours:** 4  
**Meeting Time:** 9:15 – 10:45 MTuWThF in SCEN 406

**Required Materials:** There are two aspects of the required materials: the MYMATHLAB Student Access Kit and the Point Solutions clicker.

**SOFTWARE:** MYMATHLAB (MML) STUDENT KIT—The MML is available through your university Blackboard account. Login to Blackboard for access.

**PROBLEMS WITH THE SOFTWARE:** If you are able to open your course but you are not able to access your assignments, please try again. Be sure that your browser will support the MML software (**BE SURE TO RUN THE BROWSER CHECK ONCE YOU GET STARTED!!**). From time to time, you may receive messages that your session has timed out. This often is due to the cookies downloaded to your computer from the MML website. To resolve this issue, either delete the cookies from your computer or try logging in with a different browser (e.g., Chrome, Firefox, Safari).

**AUDIENCE RESPONSE:** The Point Solutions audience response system will be used in all lectures. The student is required to bring the clicker to every lecture. Students must register their clicker—this ensures that I will be able to link you with your clicker ID. You may also use the app from Point Solutions in place of a clicker.

**Textbook:** *Calculus, Early Transcendentals, Third Edition*, William Briggs, Lyle Cochran, Bernard Gillett, 2019, Pearson. As stated earlier, this is not required, as there is an electronic version of the textbook included in the MYMATHLAB kit. However, if you work better from a print version, I suggest you obtain a copy, as it will be used in future calculus courses as well.

**Calculators:** Calculators are not necessary for the course. No calculators or online resources will be allowed during exams or quizzes. Calculators and computers may be used for homework or for class investigations but are not necessary.

**OTHER TECHNOLOGY:**

Please do not have your cell phone on during class. Cell phones, iPods, smart watches, etc. will not be allowed to be visible or used in any way during quizzes and exams. Do not plan to use these devices for a clock on any quiz or exam. Any device using earplugs/headsets is not allowed to be used in class. If

you have any of these devices in your backpack or pocket during class, be sure that they are turned off and left in your backpack or pocket.

### **GRADING:**

Grades for this course will be determined as follows:

|                                    |     |
|------------------------------------|-----|
| Homework (Mylabsplus + Attendance) | 10% |
| Quizzes                            | 15% |
| Exam 1 (tentatively June 5)        | 15% |
| Mid-Term (tentatively June 17)     | 20% |
| Exam 3 (tentatively July 2)        | 15% |
| Final (July 16, comprehensive)     | 25% |

Letter grades will typically follow a 90-80-70-60 scale, although the instructor reserves the right to revise downward if necessary.

The single best indicator of success in any calculus course is **DOING THE HOMEWORK!** There is simply no better tool for mastering the material. The course moves very quickly, so don't get behind! The homework will have a written component (e.g., paper HW from the textbook) and an online component (e.g., computer HW from mylabsplus). Generally, there will be a paper homework assignment for each class meeting. No paper homework assignments will be collected for grading. However, it is extremely important that you keep up with homework, as this is the practice and important learning experiences you need in order to be successful on quizzes and exams. (A minimum of two hours per night is to be expected.) Computer homework will be posted on MML. You are strongly encouraged to complete all of the online HW as well as the assigned book problems. The general trend will be that there will be 1-2 Computer HWs per week over the course of the semester. **Note that computer homework comes with deadlines.** After the deadline, the computer homework will not be available. Computer homework applies to your course grade. If you are keeping up with the material you should do well on the HW. The HW will count for 10% of your final grade.

Additionally, there will be quizzes, with the problems usually coming from the book HW. The quizzes will count for 15% of your final grade. There will be two different types of quizzes—shorter, 2-3 question “in class” quizzes that will occur at the end of class, and take-home quizzes with 6-10 problems that will require more time for completion.

**Attendance & Class Participation:** Class attendance is required and extremely important. We will meet daily either in class or with videos of lessons posted on Blackboard. Attendance is part of your grade—therefore, absences from class will influence your grade in more ways than just your overall performance. Participation in class activities and discussion is encouraged. Attendance will be worth two 10-point homeworks in your final grade. Attendance questions will be used to record attendance—therefore it is imperative that you bring your clicker to each class. Your correct responses on these questions will also comprise one HW assignment over the course of the semester.

**Statement for Academic Integrity:** As a core part of its mission, the University of Arkansas provides students with the opportunity to further their educational goals through programs of study and research in an environment that promotes freedom of inquiry and academic responsibility. Accomplishing this mission is only possible when intellectual honesty and individual integrity prevail. Each University of Arkansas student is required to be familiar with and abide by the University's Academic Integrity Policy that may be found at

<http://provost.uark.edu/>. Students with questions about how these policies apply to a particular course or assignment should immediately contact their instructor.

Students who fail to abide by the Statement of Academic Integrity by cheating (such as using online resources to complete quizzes or tests) will be reported to the Office of Academic Integrity, which may result in the student earning a 0 for the assignment and potentially an XF for the final grade.

**Classroom Etiquette:** Students and instructors each have an important role in maintaining a classroom environment optimal for learning and are expected to treat each other with respect during class, using thoughtful dialogue, and keeping disruptive behaviors to a minimum. Both students and faculty perceive abusive language directed towards others as the most disruptive behavior. Other behaviors that can be disruptive are chatting and whispering during class, the use of smartphones or laptops for texting or in other ways unrelated to the course, preparing to leave before class is over, and consistently arriving late to class. Inappropriate behavior in the classroom (whether in a lecture or a drill session) may result in a request to immediately leave the classroom and/or a referral to the Office of Academic Integrity and Student Conduct.

## **TUTORING**

There are free student tutors in UA Student Success and CHPN 326 (the MRTC Teaching Center). Visit their websites for the latest hours. It is HIGHLY advisable that you seek out help and assistance should you need it!

Student Success: <https://success.uark.edu> MRTC: <https://fulbright.uark.edu/departments/math/mrtc/>

## **Accommodations:**

Students who are registered with the Center for Educational Access must meet with the instructor by the end of the first week of class, or within one week of registering with CEA to discuss their accommodations. If a student is eligible for special accommodations on an exam, the instructor must be notified of the required accommodations at least one week before the date of the exam so proper arrangements can be made.

## **EMERGENCY PROCEDURES**

Many types of emergencies can occur on campus; instructions for specific emergencies such as severe weather, active shooter, or fire can be found at [emergency.uark.edu](http://emergency.uark.edu).

### **Severe Weather (Tornado Warning):**

- Follow the directions of the instructor or emergency personnel
- Seek shelter in the basement or interior room or hallway on the lowest floor, putting as many walls as possible between you and the outside
- If you are in a multi-story building, and you cannot get to the lowest floor, pick a hallway in the center of the building
- Stay in the center of the room, away from exterior walls, windows, and doors

### **Violence / Active Shooter (CADD):**

- **CALL- 9-1-1**

- **AVOID-** If possible, self-evacuate to a safe area outside the building. Follow directions of police officers.
- **DENY-** Barricade the door with desk, chairs, bookcases or any items. Move to a place inside the room where you are not visible. Turn off the lights and remain quiet. Remain there until told by police it's safe.
- **DEFEND-** Use chairs, desks, cell phones or whatever is immediately available to distract and/or defend yourself and others from attack.

***THIS SYLLABUS IS SUBJECT TO CHANGE. You will be notified in email, on MML, and/or in class of changes. Failure to check your email and/or failure to read the announcements in MML and/or failure to attend class will not constitute a reason to be allowed to make up any assignments, tests, or changes to the course.***

#### **MATH 25004 COURSE OUTLINE AND SUGGESTED SCHEDULE:**

**This schedule is an approximation and subject to change.**
